Arizona Corporation Commission

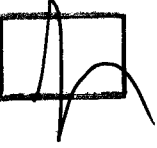

DOCKETED

To Commissioners Kunasek, Irvin, Mundell
from Jack Grenard, Cave Creek
re: Solar & Environmentally Friendly Portfolio (Code 19Y)

ARIZONA CORPORATION COMMISSION
DOCUMENT CONTROL

APR 24 2000

Gentlemen:

DOCKETED BY	
-------------	---

I hope you will support requiring Arizona's electrical utilities to produce at least one per cent of all electricity sold in our state to come from renewable energy sources. I am willing to pay the additional half-dollar a month this measure is estimated to cost the average household.

Thank you for considering my wishes.

To the Arizona Corporation Commission:

I am writing to support the "Solar and Environmentally Friendly Portfolio Standard". We are increasingly in need of clean, renewable energy sources, both to safeguard our air quality as well as to develop alternative means of energy in preparation for future fossil fuel shortages. My family is more than willing to pay 50 cents a month today for better environmental conditions tomorrow.

Thank you.

Arizona Corporation Commission
Utilities Division

Carl J. Kunasek (Chairman)
Jim Irvin
William A Mundell

Dear Sirs:

It has come to my attention that the Commission is considering a proposal to adopt a "Solar and Environmentally Friendly Portfolio Standard." I fully support this idea knowing that it will improve the quality of life for Arizona residents by creating jobs, developing renewable energy, improving air quality and protecting the environment in general. Apparently, Arizona electric utilities, mining companies, and other big business interests are opposed to a requirement that a mere 1% of all electricity sold in our state come from renewable energy sources. On the thirtieth anniversary of Earth Day, in a state that enjoys over 300 days of sunshine a year this seems pretty shameful. Obviously, the voluntary program that has been in place since 1994 is not going to deliver. You have my total support for choosing the requirement and I will be pleased to pay the estimated 50 cents a month that the Portfolio Standard will cost.

Sincerely,
David P. Mills

Subject: Clean Energy for Arizona

Dear Commissioners Irvine, Mundell and Kunasek:

As you prepare to discuss the proposal to adopt a Solar and Environmentally Friendly Portfolio Standard, my husband and I wish to voice our opinion in favor of the development of renewable energy in Arizona. We support the requirement that 1% of all electricity sold by 2005 come from clean, renewable energy sources. We are willing to pay the estimated 50 cents a month more to fund the Portfolio Standard. We hope you will agree and vote for this important improvement for our state and all of us who live here.

Regards,
Kathi and Mike Houghtaling

Subject: Portfolio Standard

Hello,

I urge you to promote the development of renewable energy in Arizona. The voluntary program that has been in place since 1994 has failed to deliver. It makes very good sense and I support the Solar and Environmentally Friendly Portfolio Standard. I and many others are willing to pay 50 cents a month more to fund the Portfolio Standard. Do the right thing. vote FOR the development of clean energy.

Thank You

Subject: Solar Energy

To whom it may concern: With the favorable weather conditons of the Southwest, over 300 days of sunshine a year, it would be a good place for the research and development of photovoltaic energy sources, I would be willing to pay more on my utility bill if a portion of the electricity is generated by photovoltaics and wind turbines (it is also quite windy here on the plateau). I was told to mention the code 19Y.

Subject: I support solar energy!

I would like to express my support for the Solar and Environmentally Friendly Portfolio Standard. Clean, renewable energy is undeniably necessary for the advancement of ecologically sensitive development. Population growth in the west is inevitable, and if we are to preserve our standard of living, as well as the irreplaceable natural qualities of the Arizona landscape, we absolutely must reduce our dependence on petroleum fuels and hydroelectricity. Please record my name as one of the many folks who would gladly pay fifty cents for the real implementation of solar energy in Arizona.

Sincerely,

Mikele Painter

Subject: Solar Power: code 19Y

Commissioners Kunasek Irvin, and Mundell

I am concerned about the non-renewable source of our power. I believe we must promote the development of renewable energy in Arizona. The voluntary program that has been in place since 1994 has failed to deliver adequate renewable power sources. I support the Solar and Environmentally Friendly Portfolio Standard, and am willing to pay 50 cents a month more to fund the Portfolio Standard. I urge you to support the Standard, also.

Respectfully,

Travis Bone
